

FOR IMMEDIATE RELEASE

Meta's eSignature Solution Benefits MedScribe Transcription Clients

New York, NY — Meta Health Technology announced that its PowerSign electronic signature solution has been implemented at four hospital clients of MedScribe Information Systems.

Through a re-seller relationship with Meta, MedScribe offers electronic signature in addition to transcription services to its hospital clients. When physicians log on to the MedScribe server, they can now view and edit their transcriptions and sign them electronically.

According to Eli Nahmias, President of Meta Health Technology, "We are especially pleased with our relationship with MedScribe because this is a situation where everyone benefits. Combining electronic signature with transcription makes the physician's workflow much easier, and it also gives MedScribe an advantage vs. their competition."

For MedScribe, there were two critical factors in their decision to work with Meta. "We chose Meta because of the excellent functionality and ease of use, and because of Meta's ability to integrate their product seamlessly with ours," says John Langley, CEO of MedScribe.

Meta's PowerSign product is a web-based application that provides a highly secure, HIPAA-compliant method for signing patient documents from any web-enabled computer. There is no need to install software at individual hospitals, because all information is centralized on the secure MedScribe web site, easily accessible to authorized physicians and HIM staff. In addition to signing, PowerSign enables physicians to edit the documents, insert missing words and add an entire addendum, if necessary. The application also keeps an audit trail of all changes made, so that users can always view or print the latest version of the document.

About MedScribe

MedScribe is a full-service transcription company based in Jacksonville, Florida. From large hospitals and community health centers, to outpatient clinics and single physician practices, MedScribe works with each client to develop transcription solutions for any need. The company serves over 12,000 physicians in 25 states.
