

FOR IMMEDIATE RELEASE

Meta Health Technology Announces PowerView™

*New Management Dashboard Helps Monitor Performance
of HIM Departments & Meet Demand for Accountability*

Washington, DC - Meta Health Technology announced today at the joint IFHRO and AHIMA Conference in Washington, DC the availability of PowerView, a new dynamic management tool that helps HIM managers monitor the performance of their departments any time anywhere with a web browser. At a glance, HIM managers can see how they are tracking on key measures for abstracting/coding, record completion, chart tracking, and release of information (ROI). With this tool, managers can immediately identify issues or problems and address them before they escalate.

PowerView was developed to help Meta's clients meet the increasing demand for accountability at every level in health care organizations. The product is the newest addition to Meta's CHARMS 2000 suite of software solutions that enhance day-to-day operations in the HIM department.

PowerView provides a potent productivity monitoring tool that tracks such metrics as unbilled dollars, number of incomplete records, percent of charts delivered on time, number of outstanding requests for information, etc.

The system automatically gathers all this data from the installed CHARMS 2000 applications and displays these statistics on a single screen with an easy-to-read dashboard-like presentation that alerts managers when key measures deviate from the target.

“Today in HIM, and everywhere in hospitals, it's about accountability. We know from listening to our clients that HIM departments are under increasing pressure to deliver results, and there are key metrics that they monitor very closely. Unbilled dollars, for example, is at the heart of the hospital's financial health. With PowerView, HIM Directors can quickly assess their key metrics and take whatever action might be necessary,” said Eli Nahmias, President and CEO of Meta Health Technology.

About Meta Health Technology

Meta Health Technology is a full-service provider of software solutions that enhance day-to-day operations in today's Health Information Management department. Meta's specialty is HIM, and its products are designed to meet the specific needs of the HIM department. Headquartered in New York City, the company has served the healthcare industry exclusively for over 25 years. Meta's clients range from small community hospitals to many of the largest and most prestigious medical facilities across the United States and in Canada. The company provides a level of client service that is unmatched in the industry.

Meta's CHARMS 2000™ is a comprehensive suite of HIM applications designed to automate and augment critical HIM functions, including EMR, abstracting and coding, chart tracking, deficiency management, release of information, document imaging, electronic signature and department management. CHARMS 2000 is designed for acute care and other hospitals, HMOs and large physician groups.

More information about Meta Health Technology is available on the Internet at www.metahealth.com, or by calling 800-334-6840.
